

Housings & Pedestals

Custom Housings & Pedestals

These housings and pedestals are typically used for the installation of card readers, intercoms and other devices at vehicular and pedestrian access points.

Housings are supplied with cam locks and "tilt-in" front panels to provide security and ease of access. Hole patterns may be provided in panels to facilitate the installation of a variety of popular access control products. Twelve-gage steel, zinc plating and white or black powder coat finish provides maximum resistance to the affects of the weather.

Below are some examples of custom housings and pedestals we can supply.

 <p>Housing with dome camera, intercom and card reader</p>	 <p>Housing with hole pattern for double gang device with straight pedestal</p>
 <p>20" wide X 15" tall acrylic housing with long range card reader, intercom and camera</p>	 <p>12" X 8" housing with pedestal</p>
 <p>Style 3 pedestal</p>	 <p>Dual height pedestal for car and truck traffic</p>
